These PDF format manuals are available on the Canon website. Please download them from the following URL: <http://web.canon.jp/imaging/information-e.html>

1

Preparing the Camera

→ Camera User Guide

A. Charge the battery pack.

Place the battery pack in the battery charger and plug the charger into a power outlet or attach the power cord to the battery charger and plug the other end into a power outlet. The charge indicator lights orange while charging and changes to green when the battery pack is charged. Charging the battery pack takes approximately 90 minutes.

Charge Indicator

• Battery charger model names and types vary by region.

B. Install the battery pack.

Slide the SD card slot/battery cover open. Push the battery lock in the direction of the arrow and hold it while aligning the ▲ on the battery pack and battery chamber to insert the battery pack.

Battery Lock

▲ Symbol

C. Install the SD card.

Insert the SD card all the way until it clicks. Slide the SD card slot/battery cover closed.

Front

To remove the SD card
Push the SD card with your finger or the translucent toggle on the wrist strap until the card clicks and then release it.

2

Shooting

→ Camera User Guide

A. Slide the mode switch to (Shooting).

B. Press the power button to turn the camera on.

Set the date and time (first time the camera is powered on).

Power Lamp

① Use the or button to select the items you wish to set, and the or button to change the value.

② Check that the date and time shown are correct, then press the FUNC./SET button.

C. Aim the camera at the subject and adjust the zoom to achieve the desired composition (see "Zoom" in the "Quick Reference" section).

D. Focus and shoot.

① Press the shutter button halfway to focus.

• The camera focuses and beeps twice.

② Press the shutter button all the way to shoot.

3

Playback

→ Camera User Guide

A. Slide the mode switch to (Playback).

B. Play back the images.

Use the or button to display the image you wish to see.

4

Erasing an Image

→ Camera User Guide

A. In Playback mode, use the or button to select an image to erase (①) and press the button (②).

B. When the confirmation screen appears, check that [Erase] is selected and press the FUNC./SET button.

Select [Cancel] using the or button to cancel without erasing.

Quick Reference

→ Camera User Guide

Mode Switch

→ Shooting:

Slide the mode switch to .

→ Movie:

Slide the mode switch to .

→ Playback:

Slide the mode switch to .

Shooting Modes

Press the FUNC./SET button once.

Select a shooting mode using the or button.

Auto

Shoots with settings selected by the camera.

Manual

Lets you adjust the exposure, white balance, photo effect and other settings yourself.

Digital Macro

You can approach as close as 3 cm (1.2 in.) to a subject to shoot (minimum focusing distance at max. wide angle setting). The image area for close-ups at the maximum power of magnification for digital macro is 9 x 7 mm (0.35 x 0.28 in.).

Portrait

Produces a soft effect when photographing people.

Night Snapshot

Use this when taking snapshots of people against twilight or night backgrounds to reduce the effects of camera shake even when shooting without a tripod.

Kids & Pets

Allows you to capture subjects that move around, such as children and pets, without missing photo opportunities.

Indoor

Prevents camera shake and maintains the subject's true color when shooting under fluorescent or tungsten lighting.

Underwater

Appropriate for shooting images with the All Weather Case AW-DC30 (sold separately). This mode uses an optimal white balance setting to reduce bluish tones and record images with natural hues.

My Colors

Use these modes to change image colors and then shoot.

Macro/Infinity Mode

Press the to display the or on the LCD monitor (not available in certain shooting modes).

Displayed

Use this mode to shoot close-ups of flowers or small objects.

Recordable Area at Minimum Shooting Range

<Shooting Distance>

Max. wide angle setting: approx. 37 x 27 mm (1.5 x 1.1 in.)

<From the front of lens: 3 cm (1.2 in.)>

Max. telephoto setting: approx. 108 x 81 mm (4.3 x 3.2 in.)

<From the front of lens: 30 cm (1.0 ft.)>

Displayed

Use this mode to shoot scenery or distant subjects.

Quick-bright LCD

Pressing the DISP. button for at least 1 second switches the brightness to the highest setting.*

* If the monitor is already set to its maximum brightness in the Set up menu, this function is not available.

Changing the Displayed Information

Press the DISP. button to switch the displayed information as follows.

Shooting Mode:

→ LCD monitor - On (No Information)

→ LCD monitor - On (Information View)

→ LCD monitor - Off

Playback Mode:

→ Standard Information View

→ Detailed Information View

→ No Information

Zoom

The zoom can be adjusted from 35 to 105 mm (35mm film equivalent)

Wide Angle:

Zoom out from the subject.

Telephoto:

Zoom in on the subject.

Flash

The flash setting changes with each push of the .

*The flash cannot be set in some shooting modes.

Auto

Auto with red-eye reduction

Flash on with red-eye reduction

Flash on

Flash off

Slow Synchro

Flash range:

50 cm - 3.5 m (1.6 - 11.5 ft.) (wide-angle)

50 cm - 2.0 m (1.6 - 6.6 ft.) (telephoto)

Red-eye reduction:

This feature reduces the effect of light reflecting back from the eyes and making them appear red.

Slow Synchro:

The flash timing is adjusted to a slow shutter speed, allowing you to shoot night scenes.

In addition, there are functions that can be set in each shooting mode. For details, see "Functions Available in Each Shooting Mode" at the end of the Camera User Guide.

5

Printing with a Direct Print Compatible Printer

→ Direct Print User Guide

A. Connect the camera to the printer and turn on the printer's power.

Set the camera to Playback mode and turn the power on.

Camera

Interface Cable

Printers

* The displayed icon may vary depending on the printer model.

C. Display an image for printing and press the .

The will flash blue and the printing will start.

Please turn over

6 Preparing to Download Images to a Computer → Camera User Guide, Software Starter Guide

! Never connect the camera to the computer before the software is installed.

List of Things to Prepare

- Camera and Computer
- Canon Digital Camera Solution Disk provided with the camera
- Interface Cable (use the cable provided with the camera)

A. Confirm that the computer meets the system requirements.

See the *Camera User Guide*.

B. Install the software.

- a. Place the Canon Digital Camera Solution Disk into your computer's CD-ROM drive.

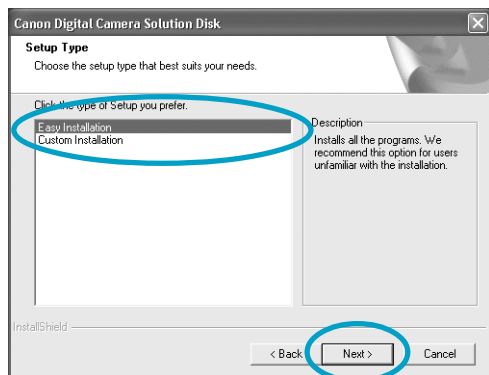

Macintosh

- Double-click the [Canon Digital Camera Installer] () icons in the CD-ROM window.

- b. Click the Digital Camera Software [Install] button and click [Next].

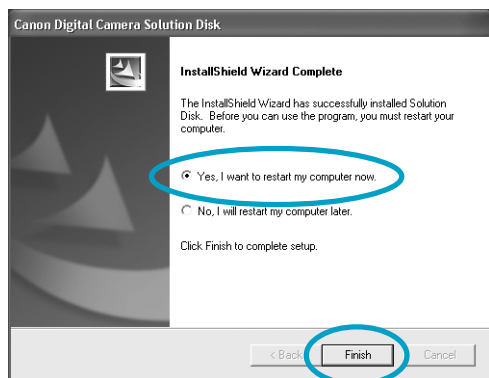

- c. Select [Easy Installation] and click [Next].

Proceed with the installation while reviewing installation settings.

- d. When the installation is complete, select [Yes, I want to restart my computer now.] as shown in the screen below, and click [Finish].

Macintosh

Once the installation is complete, click [Quit].

- e. Remove the disk from the CD-ROM drive after restarting.

Macintosh

Set the ImageBrowser auto start settings before you connect the camera to the computer for the first time.

■ ImageBrowser Auto Start Settings

OS X (v10.2/v10.3)

1. Start Image Capture, click the [Image Capture] menu and select [Preferences].
2. In the next menu, click the [When a camera is connected, open:] list box and select [Other].

The window will appear slightly different in v10.2.

3. Select [CameraWindow] in the program selection window. CameraWindow is generally installed into the folder opened by selecting the [Applications], [Canon Utilities] and [CameraWindow] folders.
4. Click [OK] and then close Image Capture.

OS X (v10.1)

1. Start Image Capture and select [Other] from the [Hot Plug Action] list box.

2. Select [CameraWindow] in the program selection window.

CameraWindow is generally installed into the folder opened by selecting the [Applications], [Canon Utilities] and [CameraWindow] folders.

3. Close Image Capture.

C. Connect the camera to the computer.

- a. Connect the supplied interface cable to the computer's USB port and the camera's DIGITAL terminal.

1. Open the terminal cover with the translucent toggle on the wrist strap.
2. With the ↔ facing in the direction shown, insert the interface cable until it clicks into place.

Treat the connector area with great care while you attach and remove the interface cable.

- b. Slide the mode switch to (Playback) (1) and press the power button to turn the camera on (2).

The camera and computer will be ready to communicate with each other.

Windows

If the Digital Signature Not Found window appears, click [Yes].

The USB driver will automatically finish installing onto the computer when you attach the camera and open a connection.

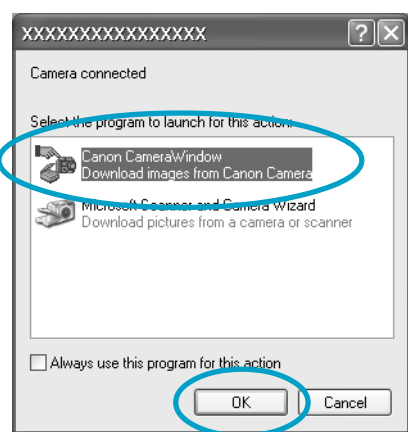

7 Downloading Images to a Computer **Windows**

→ Camera User Guide, Software Starter Guide

A dialog allowing you to set the default settings will display when you attach the camera and open a connection.

A. Select [Canon CameraWindow] and click [OK] (first time only).

! If the window shown above does not appear, click the [Start] menu, then select [Programs] or [All Programs], followed by [Canon Utilities], [CameraWindow] and [CameraWindow].

B. Download the images.

Download the images using the camera or the computer.

By default, the downloaded images are saved into the [My Pictures] folder.

You can set the type of image to download and the destination folder by clicking [Preferences].

The downloaded images will appear as thumbnails (tiny versions) in the Main Window of ZoomBrowser EX. By default, the downloaded images are saved in separate folders according to the date on which they were shot.

Downloading Images Using Camera Operations (Direct Transfer)

- a. Confirm that the button lights blue.

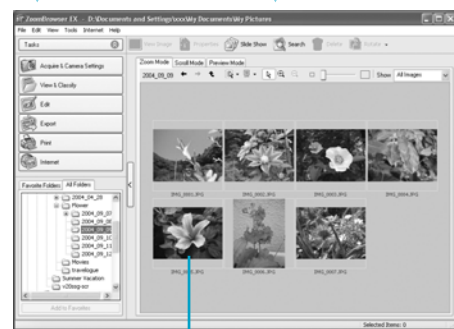

- b. When the Direct Transfer menu appears in the camera's LCD monitor, use the ↑ or ↓ button to select (All Images) and press the button.

All the images on the camera's memory card will download. To selectively download images, select (Select & Transfer).

Downloading Images Using Computer Operations

- a. Click [Starts to download images].
By default, all the images that have yet to be downloaded will download.

Thumbnail

Thumbnail

Image download is complete.

7 Downloading Images to a Computer **Macintosh**

→ Camera User Guide, Software Starter Guide

The following window will display when the camera and computer are set to the correct mode for communicating.

Double-click the [Canon CameraWindow] icon on the desktop if the window does not appear.

A. Download the images.

Download the images using the camera or the computer.

By default, the downloaded images are saved into the [Pictures] folder.

You can set the type of image to download and the destination folder by clicking [Preferences].

The downloaded images will appear as thumbnails (tiny versions) in the Browser Window of ImageBrowser. By default, the downloaded images are saved in separate folders according to the date on which they were shot.

Getting the Most out of the Software → Software Starter Guide, ZoomBrowser EX / ImageBrowser Software User Guide

What you can do with ZoomBrowser EX (Windows) / ImageBrowser (Macintosh)

■ Downloading Images to a Computer

You can easily download images saved in the camera to a computer.

■ Checking Images

You can magnify images and check the information on them (the shooting date and time, the shooting settings, etc.)

■ Sending Images by E-mail

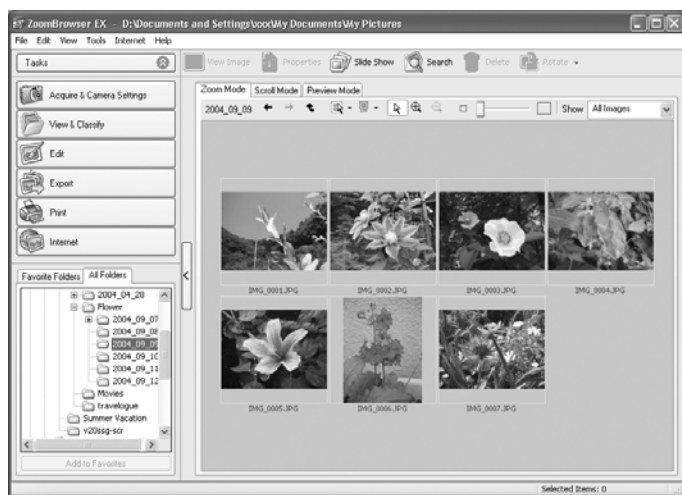

You can start your e-mail program from ZoomBrowser EX (Windows) / ImageBrowser (Macintosh) and attach images to e-mail messages that you send.

■ Editing Movies

You can create and edit movies: link movies and stills that have been downloaded to your computer, add background music, superimpose titles and other text, and apply various effects to the movies.

■ Using the My Camera Settings

Your favorite images and sounds can be registered as startup-up images and sounds with My Camera Settings.

What you can do with other software

You can use this software in even more advanced ways by linking it with other software.

■ Printing Images with Different Layouts

With PhotoRecord (Windows)/ ImageBrowser (Macintosh), you can lay out images as desired and then print them.

■ Stitching Panoramic Images

With PhotoStitch, you can connect or "stitch" multiple images together into a seamless panoramic view.

A Guide to the Manuals

■ Basic Methods: Software Starter Guide

The manuals in PDF format shown below are available on the Canon website. Please download them from the following URL:

- <http://web.canon.jp/Imaging/information-e.html>
- ZoomBrowser EX Software User Guide (Windows)
- ImageBrowser Software User Guide (Macintosh)

Viewing the PDF Manuals

The software application Adobe Reader or Adobe Acrobat Reader is required to view the PDF manuals. If one of these applications is not already installed on your computer, download it from the following website.
