IXUS M-1

REAL SIZE

The superbly styled, ultra-lightweight Advanced Photo System camera

The world's lightest Advanced Photo System camera

At just 115 grams, the incredible Autofocus IXUS M-1 is the lightest Advanced Photo System camera in the world. Small enough to fit in your pocket, or comfortably in the palm of your hand. Pick one up and you'll see for yourself; you can carry the IXUS M-1 with you everywhere. In fact the IXUS M-1 is so small that you never need to miss a great photo opportunity again.

Great styling, great features.

Form or function? With the IXUS M-1 you have both. Eye-catching design and a host of Advanced Photo System advantages. Like a choice of three formats: Panoramic, High Vision or Classic, easy drop-in film-loading and Canon's advanced magnetic IX functions for improved print quality at the time processing. The IXUS M-1 has it all.

C (CLASSIC)

H (HIGH VISION)

P (PANORAMIC)

Full range of flash functions.

With the flash functions the IXUS M-1 offers, you can let the camera make the decision, or decide yourself to use the flash or not. From autoflash mode to forced flash-on, where you use for example the flash to illuminate a subject lit strongly from behind. From red-eye reduction to the slow synchro mode, for better exposed night scenes, your IXUS M-1 gives you the freedom to be in control.

Built-in date and titling.

You'll never have to ask yourself when you took that photo again. Simply select the date function and you can have the data printed on your finished photographs. Similarly you can personalise your photos by selecting one of the five pre-programmed messages to be printed during processing, if your laboratory offers this possibility.

Specifications IXUS M-1

Type: fully automatic IX 240 AF lens shutter camera with magnetic IX functions

Image Size: 16.7 x 30.2 mm
