STYLISH, TINY AND AFFORDABLE.

Canon's simplest ultra-lightweight

Advanced Photo System camera. The IXUS AF is small enough to fit comfortably in your pocket or in the palm of your hand. Because it's so incredibly light, you can carry one everywhere (and never regret missed photo opportunities again).

Very stylish and very affordable

too. The camera is attractively priced and shares the superb IXUS styling. It has a distinctive two-tone blue metallic and black body colour.

IXUS AF

Easy to use. Just drop in the film, then point and shoot. The IXUS AF will automatically focus the 25mm high performance glass lens from a minimum distance of 0.8m. The built-in flash fires automatically but can also be controlled manually, including red eye reduction.

Print format versatility. Our IXUS AF camera offers you a choice of three print formats: Classic for all types of pictures, High Vision for a wider view or Panoramic for truly spectacular effects. The print format can be changed before every new frame, as often as you wish throughout the film. An index printing sheet, supplied with your prints, will help you decide which shots to duplicate, enlarge or reprint using a different print format.

C (CLASSIC)

H (HIGH VISION)

P (PANORAMIC)

Information at a glance. The camera has an easy-to-read LCD panel, showing a film counter, battery level indicator, flash and self-timer settings and print format selected. With a special QD (Quartz Date) model¹⁾, date and time can, if required, be displayed at the bottom of your prints (preventing lively debates in years to come).

1) QD model not available in certain countries.

Specifications IXUS AF

Type: fully automatic IX 240 AF lens shutter with built-in optical IX functions

Image Size: 16.7 x 30.2mm
