the world's most remarkable precision

FULLY GUARANTEED

Canon Camera Company, Inc.

Manufacturer & Exporter of Canon Cameras & Serenar Lenses

Canon Camera means Good Pictures in untrained hand
and Top Quality in skilled hand

Double exposures prevented
(Trick shots possible)

1/25 to 1/1000 second and B (Bulb)

Three-position Magnifying
Range-View Finder

for critical focusing
and for telephoto
lenses

1/25 to 1 second and T (Time)

High resolving and covering power

Designers and engineers of Canon Camera Company Inc. have given this new model countless improvements in many respects over previous models. It is assembled by our skillful craftsmen, and is rigidly tested by our technicians by putting it through numerous testing instruments in order to withstand any circumstances imaginable. Although the appearance may look similar to the previous model—Model II-B—its smooth operation, accurate performance and durability are far superior to any of our past models and can well compete with the finest precision photographic optical instruments available today.

See all these distinctive features !!

- ★ Smooth and accurate Focal-plane Shutter has a speed range from 1 second to 1/1000 second plus B (Bulb) and T (Time).
- ★ Unique Three-position Magnifying Range-View Finder assists in easier and critical focusing.
- ★ Uses 35mm film—36 double frame exposures 24 × 36mm (1 × 1 1/2") in size.
- ★ Split-second shots possible with combined dust-proof Rangefinder and Viewfinder.
- ★ Double exposures prevented.
- ★ Double exposures—trick shots—possible.
- ★ Ultra hard-coated and color corrected SERENAR lens has high resolving and covering power.
- ★ Smart-looking, angled die-cast aluminium body protects precision mechanism.
- ★ All exposed metal parts are satin or hard chromium plated.
- ★ Body has attractive, durable black plastic-leather finish.
- ★ Interchangeable with SERENAR lenses of different focal length.
