CAMERAS, LENSES, FLASH UNITS AND ACCESSORIES

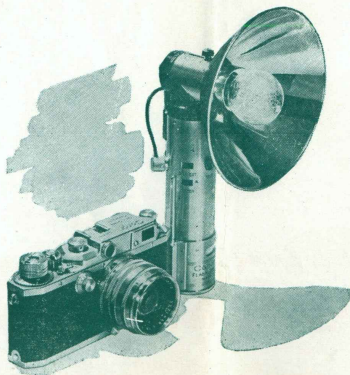

DO YOU KNOW?

- **THAT** in Hongkong you can buy the latest Model IV-S2 'Canon' Camera with a 50 mm f:1.8 lens, synchronized to flash and speedlight, at about half the price you would have to pay Stateside, and 15% to 20% cheaper than in Korea?

THAT in Hongkong the prices of all the remaining 'Canon' products are lower than those charged in Korea, lower than Japanese retail prices and also about half of what you would have to pay in U.S.A.?

- **THAT** you save 30% commodity tax which you would have to pay if you bought a camera in Japan?

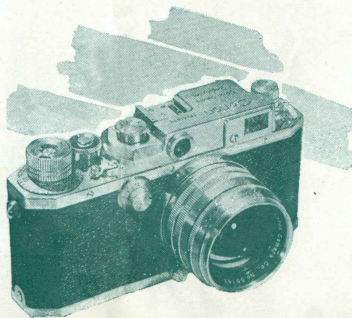

- **THAT**, if you travel to Japan, you will not have to pay any import and/or export duty there for your 'Canon' camera? Just declare it as your personal kit and have it registered as such when entering Japan.

- **THAT** due to heavy demand, very negligible quantities of 'Canon' products are available for sale in the PX in Japan. There you can only buy: The non-synchronized Model III-A camera and with regard to Telephoto-lenses, only those with the smaller aperture (f:4.0) which have since been replaced by the faster f:3.5 lenses, obtainable in Hongkong?

- **THAT** in Hongkong you can buy a complete range of the latest 'Canon' photographic products, such as cameras, wide angle, portrait and telephoto lenses, lenshoods, filters, flash outfit and all other accessories which you may require, and which are not stocked by the PX? If your dealer does not carry stock of all your requirements, he can order them for immediate delivery from the local 'Canon' Agents (the latter cannot sell you direct).

- **THAT** all 'Canon' Cameras have a 5 Years' Guarantee and the complete line of 'Canon' products is thoroughly tested by the factory?
